Poly-Glu is planning to make water supply Kiosks and exhibit Japanese culture and technology as well.

POLY-GLU, such a small company, sets its goal as to

"make everyone can drink raw water without fear".

At first, nobody was in serious or believed in it but now it has become a real possibility.

Japanese government and international institutions support us.

The number of offers to cooperate with us is increasing. We are accepting them positively.

"By meeting POLY-GLU, your life will become more fulfilling and impressive as you look forward to next morning after today's work is finished".

I promise you this.

Kenetoshi Oda
