

Status of Community Based Drinking Water Project in Tanzania by December 2013 Funded by the Japanese Government

2 facilities are already in operation and 4 facilities are under construction.

Tanzania Water and Environmental Sanitation (TWESA), a countrywide local NGO along with our 40 local staffs is jointly working with us in this project.

Responding to serious demand, high capacity (50,000~100,000 ℓ / day) facilities are planned to be established in all the sites. Number of staffs is to be increased to 120 by the year 2014
