

# ATTENTION!

Can't we take the challenge of eradicating "world's poverty", the UNO's priority task, through CSR (Corporate Social Responsibilities) of various organization, Social Contribution Activities of different organizations and BOP Business Training of universities?

## Experiences of Collaboration Works: -----

Collaboration with IVUSA for facilitating potable water in Thailand, Mexico and Bangladesh

Even POLY-GLU being a small business enterprise can address this problem of poverty.

You can all do something praised by all. Japanese people are respected by the world's people for their unique traditions of "making no discrimination among human beings", "generosity", good behavior, commitment etc. Japanese investment abroad may contribute to "create peace and happiness in the world". Overseas investment of the self-centered nations who throw garbage here and there, who don't abide by social order and who have no moral fiber, will only create and spread "World's disorder and unhappiness". We with the pride of being Japanese should work for the world's peace that would further increase trust and dignity of our "Red Passport". POLY-GLU SOCIAL BUSINESS can create new

Collaboration with global companies

employment for its water treatment activities in the countries in need of potable water. POLY-GLU want to recruit the people from various companies, organizations and universities willing to work together while sweating. From the planning stage to the end of the project, POLY-GLU can take responsibilities of all the works like official permission, negotiations with the counterpart country etc. It will be helpful for the moral improvement of PR staffs of the participating organizations.
