

POLY-GLU Lady

Ms. Nilufa comes from a village in Barguna District.

She lives with her eleven-year-old daughter and husband.

She proudly had a presentation in front of Prime Ministers of Bangladesh and Japan, members of media and an audience of no less than 500.

Her village has about 2000 persons but no electricity.

Ms. Nilufa says “I could have a dream thanks to meeting POLY-GLU. Before that,

we had no dream.”

Japanese Ministry of Economy, Trade and Industry (METI) invited her and her 5 colleagues of POLY-GLU Lady to Japan for 10 days' training.

She had always told “I don't want to sleep” to her colleagues every day.

“I want to see everything in Japan without sleeping” , she thought.

It was such impressive for me to see her answering “I now have a dream to make my country like Japan” in an interview by media.

By seeing POLY-GLU Ladies and Ms. Nilufa, I think POLY-GLU is helping to achieve the goal of Prime Minister Abe's administration, “realization of the society where women can shine” .

Our activity touches people's hearts across the world and that generates our new courage.

POLY-GLU's activity might be small.

But I strongly believe if many people do what they can now, that will move people around and the society to bring the happiness of the world.
